WORLD OF RADIO HITLIST update

Hi Glenn, my latest Hitlist update.
https://www.w4uvh.net/hitlist.htm

1) Australia - Radio 4KZ: Updated link to home page; removed link to now non-existent schedule
2) New Zealand - RNZ National & RNZ Pacific: Updated UTC offset notations for change to DST
3) Scotland - Radio Six: removed UTC offset notation for programme schedule - times are all given as GMT(UTC)

The next update is scheduled for early May. Best wishes and 73, Alan Roe

** ASCENSION. 6135, Apr 7 at 0558, presumed Hausa as BBC scheduled 0529-0600, 125 kW at 65 degrees. Similar signal on 6195, which is ENC at 250 kW, 65 degrees to CIRAF 46SE in Kau, per HFCC. What that really is, per EiBi: R. Ndarason International targeting Chad in Kanuri. That would be 47NW, while 46SE = Nigeria (Glenn Hauser, OK, WOR)

** BRAZIL. 11780, April 3 at 0148, RNA with hyperenthusiastic coverage of a stupid ballgame; don`t hear any crowd noise, so is this live or a recap. Rather late at night to be live. Keeps mentioning Botafogo, which is the big ``fireboot`` Rio soccer team. This keeps going past 0200 instead of new token English/Spanish 0150-0200 which we did hear the previous two nights. So now we know how serious they were about that!

Richard Langley also reports: ``Based on a few words I heard/translated, perhaps it was Chile's Universidad de Chile against Brazil's Botafogo at National Stadium in Santiago, Chile for a Copa Libertadores Group A soccer match. And off at 0208 UT. Too bad if you wanted to listen to the whole game on SW`` (Glenn Hauser, OK, WORLD OF RADIO 2289)

** BRAZIL. 11780, April 4 at 0147, checking RNA via local ``Brasila`` SDR, again tonight no sign of English/Spanish, but another stupid ballgame well past 0200, without apology. Richard Langley also observes: ``And tonight (4 April UTC), I'm hearing what is presumably Deportivo Táchira (Venezuela) vs. Flamengo (Brazil). So, again no English/Spanish. Not sure how long these cup matches are going on at least with Brazilian teams. Looks like after tonight, they take a break until 8 April (local date) according to the CONMEBOL Libertadores schedule. Wikipedia tells us "The CONMEBOL Libertadores, also known as Copa Libertadores de América is an annual continental club football competition organized by CONMEBOL since 1960." And "The tournament is named after the Libertadores (Spanish and Portuguese for liberators), the leaders of the Latin American wars of independence." 11780 kHz stayed on the air past the end of the game tonight. Was still on at 0230 UT -- Richard Langley`` (Glenn Hauser, OK, WOR)

** BRAZIL. 6180 & 11780, April 5 at 0150 into Brasila SDR, the token English segment from RNB is back instead of SBG preëmptions, but it`s a repeat of the first airing on April 1, part 1 of the interview about Pará. Note IDs for this as RNB, i.e. via RNA (Glenn Hauser, OK, WOR)

** BRAZIL. 6180 & 11780, April 6 at 0147 into Brasila SDR, only S7/S9, RNA playing music until 0200, NO RNB English/Spanish and no sports and no explanation. Is it done for, or just when they get around to it? (Glenn Hauser, OK, WOR)

** BRAZIL. 6180 & 11780, now we have more details about RNB English &

Spanish:

``Rádio Nacional da Amazônia Launches Spanish and English Programs
– On March 31, 2025, Rádio Nacional da Amazônia took an important step in its programming by introducing an International Service aimed at listeners from other countries who follow the station through its shortwave broadcasts.

With a duration of 10 minutes, the program is divided as follows: five minutes in English, followed by five minutes in Spanish. It is broadcast Monday through Friday, from 10:50 PM to 11:00 PM Brasília time – equivalent to 01:50 AM to 02:00 AM Coordinated Universal Time (UTC) – on frequencies of 6,180 kHz (49-meter band) and 11,780 kHz (25-meter band).

On days when sports are broadcast, the program will not air. The production and presentation are led by journalist Ana Pimenta.

According to Sérgio Dória Partamian from the DX Clube do Brasil, “this is a commendable initiative, as the station, which is primarily domestic in nature, focuses mainly on serving the Brazilian audience, especially the isolated communities in the Amazon.”

However, “by reserving a space, albeit a short one, for international listeners, Rádio Nacional da Amazônia not only expands its reach but also strengthens cultural ties with neighboring nations and even with more distant countries that express interest and appreciation for Brazilian culture,” Partamian states.

For the DX Clube do Brasil, this initiative reinforces the value of shortwave radio as a means of communication capable of crossing borders, delivering information and entertainment to regions where access to the internet and other media is still limited.

Reception reports can be sent to:
Empresa Brasil de Comunicação
Rádio Nacional da Amazônia
SCS Quadra 8, Bloco B, 50/60 1º SS
Venâncio Shopping, Brasília DF
70333-900 – Brazil

ouvidoria@ebc.com.br

Via Sérgio Doria Partamian, Brazil, Apr 2025, AI translated from Spanish, in DXnosaurios Whatsapp group, via Horacio Nigro, Uruguay`` (WOR iog via Glenn Hauser, WOR)

** BRAZIL. 11780, UT Tue April 8 at 0149, S9+10 into local Brasila SDR, another RNB/A international service segment, first in English billed as about a climate conference coming in November in Belém, Pará, part 1 of an interview with a woman who says she is black, and a cinema actress. Voice-over translation but the underguese is JBA. 0154 ID in English, Portuguese, same in Spanish; over at 0158 for full ID in PP. Is this a different episode than the first one a week ago? I did not check for it UT Mon Apr 7 after info that this would be on M-F only = UT Tue-Sat, minus any stupid ballgame pre-emptions (Glenn Hauser, OK, WOR)

** BRAZIL. 11780, April 9 at 0150 tune-in via local ``Brasila`` SDR, but only S8/9+5, RNB English already underway, still about Pará, Belém tourism, open air market, museums, something this November. Voice-under remains audible. 0154 outro English, switch to Spanish as part 4 of this subject, interview with the Secretary of Culture. 0158 closing in Portuguese, and s/off RNA on 11780 & 6180, referring to web and 980, as this stays on the air a bit more starting `Madrugada

Nacional` show, but promoting another show at 8 am.

``Glenn --- re Rádio Nacional's English/Spanish segment. Monday (Tuesday UT) was not a repeat of the prior week. This was an interview with a black actress and filmmaker from the state of Pará. Unfortunately I could not make out her name. I find these segments to be interesting and I hope they lead to more and longer form segments à la RadioBrás. The only downside is the announcer's accent, a bit challenging at times, but that is a minor concern.
My local recording {14 minutes} is at:
http://www.popshopradio.ca/20250408_0149_UT_11780_khz_Brazil_Rádio_Nacional_da_Amazônia_English_Spanish.mp4
Tony Pavick, Hope BC Canada`` (Glenn Hauser, OK, WOR)

** BRAZIL. 28470 USB, April 7 at 2224, PU3KTM calling CQDX, among many other deep S Americans on 10m. QRZ.com: ``PU3KTM Brazil flag Brazil, Luis Pazinato, Rua Baltazar de Bem 338, Caçapava do Sul, RS 96570000, Brazil`` (Glenn Hauser, OK, WOR)

** CANADA. 15034 USB, April 8 at 1537 and various other times during the next few hours, via remotes in Bermuda, Illinois, Maryland, NO signal from CHR, Trenton Military; nor direct at random chex for a few days including 1456 April 8. Evidently turned off after months of nothing but ``no reports received``, duh. Also check at night for 6754 USB. This misbehaviour pattern has happened time and again, eventually to resume with some reports received (Glenn Hauser, OK, WOR)

** COLOMBIA. 10125 CW, April 6 at 0632, for the record, HK3QQ is still doing its crazy thing, often heard on bandscans but not bothering to re-log, i.e. letters in keyboard order with several errors or omissions, starting with QWETYUIOX... and ending with BOGOTA COLOMBIA 73. QRZ.com page ignores this, only: ``HK3QQ Colombia flag Colombia, Jesús Ernesto Reyes Castro, Bogotà 111156, Colombia QSL: hk3qq@hotmail.com Escuela de telegrafia Marconi ilustrado - Colombia Frecuencia: 7.070 CW Beacom {sic} VVV De HK3QQ Bogotá Colombia 5W Last modified: 2020-05-25 21:08:05``

Is that ever heard on 7070? I have been hearing 10125 for *years*, but have *never* seen a log by anyone else. Seems I ``own`` this, hi.

On Aug 20, 2023, I got this, and I now repeat it: ``Dear Glenn, according to the official colombian registry of colombian hams, Rabca, HK3QQ actually doesn't have a valid license. He had one but finished in november 2021. Yesterday I heard that Mr. Ernesto Reyes reporting to the Colombian Fraternity net on 7.145 khz USB at about 22.30 UTC. Sorry to have to inform that situation. Please keep my identification confident.``

I have also checked the UDXF iog and find zero logs of it or anything on 10125. O well, it`s ham so off-topic (Glenn Hauser, OK, WOR)

** CUBA [and non]. 1180, April 4 at 0408 UT, trying to detect whether R. Martí be on from Marathon FL, checking three S Florida SDRs, music from R. Rebelde dominates // 5025, but there is QRM from something on 1180. RM is so direxional that even in Miami area it`s hard to hear. Around Tulsa there is also `jamming` from KOTV 1170 IBOC noise peaking 1183 (Glenn Hauser, OK, WOR)

** CUBA. 6000, April 6 at 0310, RHC happens to be on the air, S9+30/40 but JBM. Something`s always wrong at RHC. See also UNIDENTIFIED 12000 (Glenn Hauser, OK, WOR)

** CUBA. 9790, April 6 at 0316, S9+30 of English, I think, JBM as the pointless CRI relay is prolonged. Something`s always wrong at RadioCuba (Glenn Hauser, OK, WOR)

** EAST TURKISTAN. 17735, April 3 at 1447, JBA carrier is OOFSOB. EiBi shows CRI Mandarin to Europe via Kashgar. 15590, April 3 at 1454, CRI English via Urumqi discussing blueberry mania, S9+15/20 the SSOB except for 15150 WMLK. From the land of imperialist ChiCom cultural genocide against Uighurs and other Moslems (Glenn Hauser, OK, WOR)

** EAST TURKISTAN [and non]. 15590, April 6 at 1445, CRI English S9/+5, the SSOB even exceeding 15770 WRMI at S7/S8. BUT with Doppler flutter, i.e. frequency jiggling with BFO. This is one of countless 500 kW, 308 degree beams for Europe from Urumqi, land of imperialist ChiCom genocide against Uyghurs and other Moslems. 15575 KBSWR, direct from Korea South is JBA despite targeting us, and also with Doppler flutter. WWV reports:

``The estimated planetary K-index at 1500 UTC on 06 April was 3.33. Space weather for the past 24 hours has been minor. Geomagnetic storms reaching the G1 level occurred. Radio blackouts reaching the R1 level occurred`` (Glenn Hauser, OK, WOR)

** GUAM. 15680, April 4 at 1530, S Asian language and music, S6/S8. HFCC shows KSDA, 100 kW at 285 degrees going from Kannada to Telugu during 1500-1600 (Glenn Hauser, OK, WOR)

** KOREA NORTH. 15180, April 6 at 0313, S9/+10 but noisy, at first thought maybe Romanian, but it`s stilted Spanish, as to be expected from VOK as scheduled (Glenn Hauser, OK, WOR)

** KOREA SOUTH [non]. 11880, April 9 at 0127, NO signal from KBS World Radio in Spanish, which moved to Woofferton after Greenville was closed down. Not a matter of propagation from Europe, as Romania is OK S7/S9 on 11620. Now what? O, 11880 is missing from EiBi by frequency; but still in EiBi by time as via G-w = Great Britain Woofferton. Missing from both versions of KBSWR`s own A25 schedule (Glenn Hauser, OK, WOR)

** MALI. 11975 // 13630, April 9 at 2205, French both S7/S9, CRI at 2130-2230 via Bamako aimed diversely: 20 degrees to CIRAF 37 = MW corner of Africa; and 111 degrees to CIRAF 53 = Madagascar & mainland, respectively per HFCC (Glenn Hauser, OK, WOR)

** MEXICO. 770, April 7 at 0607, YL in Spanish, instead of KKOB or WABC. No UStations on 770 are SS, so most likely 25/1 kW XEACH Monterrey NL, among 3 other XEs in IRCA log: only one 24h, not silent (Glenn Hauser, OK, WOR)

** MEXICO. 800 kHz, April 6 at 0645, very heavy distortion QRM to KQCV OKC and anything else, as previously traced to XEERG in Nuevo León. Will this ever get fixed or demolished? Such incompetence! (Glenn Hauser, OK, WOR)

** MEXICO. 1549.815, April 8 at 0250, into Durango2 SDR, aside 1550 pileup of weak signals, on H2Ofall, a JBV trace at this previously measured carrier, which is also JBA, but far too weak for any audio; XEREL Morelia presumed (Glenn Hauser, OK, WOR)

** MEXICO. 6185 -33 Hz = 6184.967, April 8 at 0248, R. Educación reactivated, whew, and again off-frequency minus, S9/+12 into Durango2 SDR, tnx tip from Ron Howard. Music until 0300 full ID for XEPPM on 6185, so not a MW simul at this time, ``a las 03 horas, vamos con las noticias, ¡adelante!`` Had been off since at least March 12. Probably all-night again with 1060 relay after 0600 (Glenn Hauser, OK, WOR)

** MEXICO. 6184.95, April 9 at 0650, XEPPM with S7 of dead air. Being back on air hardly matters if it doesn`t modulate. This was often a

problem before the quadriweek hiatus. Perhaps no one minds the SW store after midnight (Glenn Hauser, OK, WOR)

** NEW ZEALAND. 17675, April 4 at 0547, RNZP is VG S9/+15; not only the only station on this band, but virtually nothing to be heard on the 15 and 13 MHz bands! K index at 0600 was 4.00 (Glenn Hauser, OK, WOR)

** NORTH AMERICA. 6945 AM, April 6 at 0323, JBA carrier, S9+10 = noise level. Only one other report of this, as unID at 0324: https://www.hfunderground.com/board/index.php/topic,143169.0.html (Glenn Hauser, OK, WOR)

** NORTH AMERICA. 6924.9 AM, April 6 at 0324, pirate music S9+20. These say it`s Liquid Radio: https://www.hfunderground.com/board/index.php/topic,143162.0.html (Glenn Hauser, OK, WOR)

** OKLAHOMA. 89.1, April 3 around 1935 UT, listening to some $tereo music while dozing, Christian but tolerably instrumental, until DJ says he is from WOFM in Canton - something ?? The real WOFM is on 89.1 but in Alcoa TN with Air 1, no known connexion to Oasis Network originating with KNYD 90.5 Tulsa, here via Enid translator K206CA. This local quality signal was surely not DX from TN altho possible by Es if K206CA were off. There is also a Canton in OK with no stations (Glenn Hauser, OK, WOR)

** OKLAHOMA. 92.1, April 4 at 2045 UT on caradio, ``Heart & Soul 92.1 and 1140 AM``, translator K221FQ in OKC of KRMP 1140, fairly audible tho weaker than 95.3 KOKC translator. Listed 99 watts at 0 HAAT (Glenn Hauser, Enid, WOR)

** ROMANIA. 11960, April 4 at 0550, RRI English is the SSOB S8/9. It`s 300 kW, 300 degrees from Galbeni for CIRAF 27 = W Europe but also USward. This 0530 broadcast replaces the 0630 on 11930 in B24 season, which also came in well despite Cuban jamming against nothing (Glenn Hauser, OK, WOR)

** SPAIN. 15500, April 3 at 2130 check, RNE 15500 for NAm is still OFF, but 15390 for Af is back on JBA; 17715 SAm and 15520 ME are sufficient but no English on Thursdays (Glenn Hauser, OK, WORLD OF RADIO 2289)

** SPAIN. 15500, Friday April 4 at 2158 and later, token English from SNR is *still* absent from its new NAm frequency, but from 2200 audible on 15520 for ME and S8+10 equally sufficient 17715 for S America. Also detectable on 15390 for Africa. Something`s notright at Noblejas (Glenn Hauser, OK, WOR)

** SPAIN. 15389.992, Saturday April 5 at 2225, REE check into Maryland SDR: S4/S5, quite unusually, best signal on the frequency for Africa! 15500 for NAm STILL AWOL. Something`s never nominal at Noblejas. 15520 for ME only a trace, not sure if it`s something else. 17715.012 for SAm at S3/S5. No English today, of course. I don`t usually bother with precise frequencies for REE as they are within 10 Hz (Glenn Hauser, OK, WOR)

** SPAIN. 15500, April 7 at 1904, still NO signal from Noblejas REE to N America; but 17715 to SAm is S7/S9; 15520 ME JBA; 15390 Af JBA carrier. At 2214 check for token English on Mon, 15520 is now S9/+20, much better than 17715 S8/S9, and 15390 S6/S9.

Could SNR have moved 15500 to another fq for NAm? A number of alternates are in HFCC for A25, we need to check at least cursorily: 9690 & 17855, which of course have been used in previous seasons; and

15110 (Glenn Hauser, OK, WOR)

** SPAIN. 15500, April 8 at 2232 check, REE frequency to N America is finally back on the air, but if it`s Tuesday there must be no English at 2200. Into Illinois SDR S8/9+10, better than 15520 for ME, and JBA 15390, 17715. Into Maryland SDR, 15500 is S9+20, 15520 S9+10, 15390 S7/S9, 17715 S5/S7. Now, how about M/W/F? (Glenn Hauser, OK, WOR)

** SPAIN [and non]. 17715, April 9 at 2115, this RNE is the OSOB direct at S9+30/40 except for JBA carrier from NZ 17675. All 4 are on, also: 15500 S9+20/30, 15520 S9+10/20, 15390 S6/9+10. About the same by 2200 token English, 2209 feature about a collexion of algo (Glenn Hauser, OK, WOR)

** SWAZILAND. 11880, April 8 at 1458, tinkling music box IS of TWR, and English ID as from Eswátini, SSOB S6 except for 12160 WWCR signing on at 1459. EiBi shows Somali at 1500-1530, Sundays to 1545 (Glenn Hauser, OK, WOR)

** TURKEY. 11785, April 8 at 2225, VOT not off the air, fair with music direct. Into Maryland SDR, S9/+20, but somewhat heavy ACI from 11780 Brasil. Mostly music, except 2239 ``always-by-your-side promo``. 2252 or so headlines of the olds, 2254 s/off as if 1230 on 17620, awry at Ankara, and IS. 2256 restart IS with German IDs, erroneous at Emirler. Off by 2259* (Glenn Hauser, OK, WOR)

** TURKEY. 11785, April 4 at 2158 and various chex both direct and into UTwente later in the hour, NO signal from VOT English, nor on possible overrun alternates 9870/9875. Something`s always erroneous at Emirler (Glenn Hauser, OK, WOR)

** TURKEY. 11785.003+, April 5 at 2216, VOT English not off the air, S9+15/20 into UTwente, but modulation problems! Undermod and fluxuating. Same into Maryland SDR, which also has ACI from 11780 Brasil. Something`s always erroneous at Emirler (Glenn Hauser, OK, WOR)

** TURKEY. 7275, April 6 at 0322, VOT not off the air, but INTRUDING into American hamband, awry at Ankara; S9+30/40 with Turkish music, modulation OK now, and VP on 6165 (Glenn Hauser, OK, WOR)

** TURKEY. 9875.005+, Sun Apr 6 at 2046, VOT English eastward rates S9+25/30 backward into UTwente, with `Pulse of Turkey`s Foreign Policy` until 2052 music; 2056 `Letterbox`, she says it`s a bit short, email has been slow. I can never catch full names of writers, but at least countries: 1) W Bengal, India. 2) W Sussex, England. 3) Chris, Canada. 4) Lithuania. 5) Pakistan. 2107 fill with closing folk song, tune-out. So repeats if on air should start at 2226, Monday 0356. Modulation fading may be caused by AMSynch tuning at UTw as it seems OK in regular AM mode.

11785.007+, Sun Apr 6 at *2201, cuts on late with olds in progress, S9+50 into UTwente. Something`s always erroneous at Emirler. Not monitored again until 2253 s/off as if 1230 on 17620: something`s always awry at Ankara; 2254 IS, 2256 restart IS until 2258*. Traditionally includes extraneous German IDs after 2256 whether or not extraneous German broadcast follow, but my attention lapsed (Glenn Hauser, OK, WOR)

** TURKEY. 11785, April 7 at 2213 check, VOT English not off the air, S9/+20 direct but noisy. Also not on the air after 2256 in German (Glenn Hauser, OK, WOR)

** TURKEY. 11785.006-, April 9 at 2200, VOT not off the air, timesignal 2 sex late compared to WWV, s/on English as if it`s 1230 on

17620, awry at Ankara, S7/S9 and noisy not really solid. At 2221 into UTwente when measured, S9/+10, still unsolid. 2254 s/off, 2255 first notes of IS only one sesquitime before chop, no finesse, uncovering rapid clickery QRM of some sort. At least there`s no Chinese understation like on 5960 (Glenn Hauser, OK, WOR)

** U K. 5870-5875-5880, April 7 at 0557, DRM noise at S9+10. HFCC shows 0459-0600 100 kW, 78 degrees from Woofferton with BBC in English to Europe (Glenn Hauser, OK, WOR)

** U S A. 379 MCW kHz, April 9 at 0614, ND beacon listed as RUE, in Russellville AR, however for past sesquiyear has been sending only RU. Now the second letter sounds more like an S than a U -- the final dah is almost brief enough to be a dit! Progressive decline? (Glenn Hauser, OK, WOR)

** U S A. 385 MCW kHz, April 8 at 0619 UT, ND beacon HO. Believe never heard before. Nothing else beyond JBA regulars. RNA list shows 50 watts at `Hossy` Hot Springs AR, ``HO 385 HOSSY - Hempwallace, AR, serving rwy 05 at Memorial Field Apt - Hot Springs``. Perhaps turned on only when requested? But it`s a bit late for much air traffic (Glenn Hauser, OK, WOR)

** U S A. 404 MCW kHz, April 7 at 0632 UT, JBA ND beacon, HJ or HV? No, must be HU, HUtchinson KS, 25 watts, rarely audible despite proximity; while 407, HRU, HeRington KS, 25 watts is much stronger (Glenn Hauser, OK, WOR)

** U S A. 28264 CW, April 7 at 2222, EEEEEEEEEE DE WB2VVV/B. WGB list: ``28263.5 WB2VVV/B - Foster RI USA FN41cr - #0 (29 Nov 2024) Note: ID + grid + EEE - Pwr 1 Watt to a Horizontal Polarization Omni Ant.``

QRZ.com with lots of antenna photos: ``WB2VVV USA flag USA, JOHN C "Chris" FAGAS, 57 KENNEDY ROAD, FOSTER, RI 02825, USA --- If my 2m CW Beacon on 144.293 MHz from FN43eu brought you here, it has been established as an Aurora Indication Beacon operating at 40 Watts to an 11 dBi Directional Antenna aimed Northwest at the Magnetic North Pole. When there is Aurora occurring at a low enough latitude on the radio horizon, it should be heard as hissy/raspy CW from the approximate direction of the Magnetic North Pole. I also have a 222.057 MHz Beacon operating from FN43eu with 10 Watts to a Horizontal Polarization Omni Antenna, a 50.075 MHz Beacon operating from FN41cr with 2.5 Watts to a Vertical Ground Plane Antenna, and a 28.2635 MHz Beacon operating from FN41cr with 1 Watt to a Horizontal Polarization Omni Antenna. Beacon reports are both welcomed and encouraged!`` (Glenn Hauser, OK, WOR)

** U S A. 28240 CW, April 7 at 2220, CQ CQ DE N6KGR/B, with long pauses. Not in WGB list on any frequency, but QRZ.com: ``N6KGR USA flag USA, JAMES P "Paul" ACKERMAN, 4341 BOULDER CREEK CIRCLE, STOCKTON, CA 95219, USA.

Hello, out there. Been a Ham since the mid 70s. Was QRT for 25 years but doing a claw back after retirement and trying to get going again. Over the years I was KX6NX (Kwajalein, Marshall Islands) but now only use the N6KGR call sign. I was active on satellite and HF related modes. Now I'm working weak signal beacons. Trying to get a 10 meter beacon going (like we need another one) and will move to a six meter beacon thereafter. Interests are mainly VHF and UHF propagation. Love QEX related projects. 73s and see you on the bands. Paul Ackerman - 14485674 Last modified: 2024-07-05 21:01:59, 586 bytes`` - someone tell him his 10m beacon is on (Glenn Hauser, OK, WOR)

** U S A [and non]. USAGM situation, as of April 4, from a reliable source: OCB may resume broadcasting SW from Greenville to Cuba, but nothing else on the air, with those in overall charge of engineering

and transmission dismissed. It`s unlikely that the previous arrangement could be resumed in any reasonable length of time even if authorized.

The Tajikistan relays ended on April 1, also the FEBC Seoul and Jeju MW transmitters, and the Djibouti 1431 kHz relay. These were funded on a quarterly basis and DOGE would not allow them for another quarter.

RFA transmissions via the two SW sites of R Taiwan International have continued; as have Radio Liberty Russian via Radio Baltic Waves, Lithuania on 1386 kHz, but we don`t know for how much longer.

WRMI has on schedule R. Liberty in Russian on 15770 with System K, Mon-Sat at 0400-0430, or is it -0500? per sked, with something called Voice of Russia, Sundays at 0400-0430. RL via WRMI is presumably at WRMI`s initiative, unofficial. This could continue if any programming feed remains available.

Russia, China, Iran could not get rid of broadcasts from USA, but Trump succeeded in only a few weeks (Glenn Hauser, OK, WOR)

** U S A. 1180, re my attempts to hear R. Martí via remote, Marathon with 100 kW reportedly has been back on the air since March 26 (Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2288 monitoring: confirmed UT Thursday April 3 at 0130 on WRMI 5010, S9+10/25 with storm crashes into Georgia SDR; preceded at 0128 by mentions of R. República, drumming, extraneous? RR not really scheduled then. Also some intermittent CCI, maybe from SDR overload.

Also confirmed Thursday April 3 at 1652 on SW Radio, Germany, 6160.001+, S7/9+12 into UTwente, and 3975 not yet on.

WORLD OF RADIO 2289 contents: A25 schedule sources; (Algeria), Australia, Belize, Brasil, Canada, (Czechia), (France), Germany, Indonesia, Korea South non, México, Morocco and non, Myanmar, North America, Romania, Russia, (Slovenia), Spain, (Taiwan), Turkey, UK and non, USA and non, (Western Sahara); ATSC 3.0 transition; 44 MHz unID; SWL Fest; propagation outlook - (countries mentioned along with others out of order)

1300 UT Friday WRMI 15770 to NE;
2030 UT Friday IRRS 1323-Italy;
2200 UT Friday WRMI 9955 to SSE [also web-, phonecast];
2230 UT Friday SW Radio, Germany 3975;
0300 UT Saturday WTWW 5085 [irregular];
0930 UT Saturday WRMI 9455 to WNW [has been off air; or 7730];
1430 UT Saturday SW Radio, Germany 6160;
1730 UT Saturday SW Radio, Germany 3975 & 6160;
1930vUT Saturday WA0RCR 1860-AM [1900/2100];
2300 UT Saturday WTWW 9475 [suspended];
0230vUT Sunday WA0RCR 1860-AM [nominal 0315; as late as 0400];
1030 UT Sunday WRMI 9955 to SSE [also web-, phonecast];
1900 UT Sunday IRRS 1323-Italy;
2130 UT Sunday SW Radio, Germany 3975;
2330 UT Sunday WRMI 7570 to NW and/or 7780 to SW;

0030 UT Monday WRMI 7780 to SW;
0830 UT Monday SW Radio, Germany 6160;
1930 UT Monday SW Radio, Germany 3975 & 6160;
0330 UT Tuesday WRMI 7780 to SW;
1300 UT Tuesday WRMI 9955 to SSE [also web-, phonecast];
1400 UT Tuesday WRMI 9955 to SSE [also web-, phonecast];
2000 UT Tuesday IRRS 1323-Italy;
2330 UT Tuesday WRMI 9395 to NNW;
2330 UT Tuesday SW Radio, Germany 3975;
1930 UT Wednesday SW Radio, Germany 3975 & 6160;
2100 UT Wednesday WBCQ 7490v to WSW;
0130 UT Thursday WRMI 5010 to S;
1630 UT Thursday SW Radio, Germany 3975.

Financial support appreciated for our non-commercial public service program: thanks for a contribution via check on a US bank from Moises Corilloclla, Rego Park NY, to Glenn Hauser, P O Box 1684, Enid OK 73702, and says, ``Hello, Glenn, I wanted to thank you for the nice mentions on your recent World of Radio programs, and I look forward to bringing new or interesting things that I may find while scanning the bands (altho that is quite small considering the years you have been DXing). I plan to visit Peru this year as well, and I hope I can provide a bandscan of other areas or cities, if I happen to travel around. Wish you the best, Moises Corilloclla``

One may also contribute via PayPal, not necessarily in US funds, to woradio at yahoo.com
(Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2289 monitoring: confirmed first SWBC, Friday April 4 at 1310 the 1300 on WRMI 15770, S7/S8.

Confirmed Friday April 4 at 2057 the 2030 on IRRS SW via AM Italia, 1322.996-, S9+5 into UTwente. Next:

2200 UT Friday WRMI 9955 to SSE [also web-, phonecast];
2230 UT Friday SW Radio, Germany 3975;
0300 UT Saturday WTWW 5085 [irregular];
0930 UT Saturday WRMI 9455 to WNW [has been off air; or 7730];
1430 UT Saturday SW Radio, Germany 6160;
1730 UT Saturday SW Radio, Germany 3975 & 6160;
1930vUT Saturday WA0RCR 1860-AM [1900/2100];
2300 UT Saturday WTWW 9475 [suspended];
0230vUT Sunday WA0RCR 1860-AM [nominal 0315; as late as 0400];
1030 UT Sunday WRMI 9955 to SSE [also web-, phonecast];
1900 UT Sunday IRRS 1323-Italy;
2130 UT Sunday SW Radio, Germany 3975;
2330 UT Sunday WRMI 7570 to NW and/or 7780 to SW;
0030 UT Monday WRMI 7780 to SW;
0830 UT Monday SW Radio, Germany 6160;
1930 UT Monday SW Radio, Germany 3975 & 6160;
0330 UT Tuesday WRMI 7780 to SW;
1300 UT Tuesday WRMI 9955 to SSE [also web-, phonecast];
1400 UT Tuesday WRMI 9955 to SSE [also web-, phonecast];
2000 UT Tuesday IRRS 1323-Italy;
2330 UT Tuesday WRMI 9395 to NNW;
2330 UT Tuesday SW Radio, Germany 3975;
1930 UT Wednesday SW Radio, Germany 3975 & 6160;
2100 UT Wednesday WBCQ 7490v to WSW;
0130 UT Thursday WRMI 5010 to S;
1630 UT Thursday SW Radio, Germany 3975.
(Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2289 monitoring: confirmed Friday April 4 at 2200 on WRMI 9955, S9+10/20 but as usual undermodulated;

also with some splatter from 9930 WTWW.

Missed checking Fri Apr 4 at 2230 on SW Radio, Germany, 3975; anyone?

Also confirmed Saturday April 5 at 1430 on SW Radio, Germany, 6160.001+, S8/S9 into UTwente with no CCI or ACI but something much weaker on 6155, probably CRI Kashgar in Russian.

Also confirmed Saturday April 5 at 1600 on WRN North America stream.

Also confirmed Saturday April 5 at 1730 on SW Radio, Germany, 6160.000+, S9+10 into UTwente but with ACI from 6165 CRI English, Beijing site to ME, and Rttyditty circa 6164. Same time on 3975.001, however, VG clear S9/+10.

Also confirmed Saturday April 5 *ending* at 1931.3 on WA0RCR, 1860 AM, MO, S9+18 into nearby SDR, so the 1930v started very early about 1903 UT.

Also confirmed Saturday April 5 at 1930 on WRN North America stream.

Still NOT confirmed Sat Apr 5 at 1930 on WRMI webcast only, despite still showing on System B schedule; really something else.

Confirmed UT Sunday April 6 at 0344 UT on WA0RCR, 1860 AM, MO, S9+20 into nearby SDR until finished at 0353, so started circa 0325. There was too much storm noise earlier direct for me to detect me. Next:

1030 UT Sunday WRMI 9955 to SSE [also web-, phonecast];
1900 UT Sunday IRRS 1323-Italy;
2130 UT Sunday SW Radio, Germany 3975;
2330 UT Sunday WRMI 7570 to NW and/or 7780 to SW;
0030 UT Monday WRMI 7780 to SW;
0830 UT Monday SW Radio, Germany 6160;
1930 UT Monday SW Radio, Germany 3975 & 6160;
0330 UT Tuesday WRMI 7780 to SW;
1300 UT Tuesday WRMI 9955 to SSE [also web-, phonecast];
1400 UT Tuesday WRMI 9955 to SSE [also web-, phonecast];
2000 UT Tuesday IRRS 1323-Italy;
2330 UT Tuesday WRMI 9395 to NNW;
2330 UT Tuesday SW Radio, Germany 3975;
1930 UT Wednesday SW Radio, Germany 3975 & 6160;
2100 UT Wednesday WBCQ 7490v to WSW;
0130 UT Thursday WRMI 5010 to S;
1630 UT Thursday SW Radio, Germany 3975.
(Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2289 monitoring: confirmed Sunday April 6 at 1900 on IRRS SW via AM Italia, 1322.997-, S8.5 into UTwente. Next:

2130 UT Sunday SW Radio, Germany 3975;
2330 UT Sunday WRMI 7570 to NW and/or 7780 to SW;
0030 UT Monday WRMI 7780 to SW;
0830 UT Monday SW Radio, Germany 6160;
1930 UT Monday SW Radio, Germany 3975 & 6160;
0330 UT Tuesday WRMI 7780 to SW;
1300 UT Tuesday WRMI 9955 to SSE [also web-, phonecast];
1400 UT Tuesday WRMI 9955 to SSE [also web-, phonecast];
2000 UT Tuesday IRRS 1323-Italy;
2330 UT Tuesday WRMI 9395 to NNW;
2330 UT Tuesday SW Radio, Germany 3975;
1930 UT Wednesday SW Radio, Germany 3975 & 6160;
2100 UT Wednesday WBCQ 7490v to WSW;
0130 UT Thursday WRMI 5010 to S;

1630 UT Thursday SW Radio, Germany 3975.
(Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2289 monitoring: confirmed Sunday April 6 at 2000 on WRN European stream.

Also confirmed Sunday April 6 at 2157 the 2130 on SW Radio, Germany, 3975.003-, S7/S9 into UTwente.

Also confirmed Sunday April 6 at 2330 on WRMI 7780, S6/S8 into Georgia SDR, but NOT on WRMI 7570 which continues moanin` `n` groanin` from the TOMBS vesper service. --- despite WOR still on the System D sked for 7570, and 7780 unaccounted for in any individual System sked at this hour. But the transmitter sked atop is quite the contrary: TOMBS on 7570, RAE Portuguese on 7780. Somethings odd at Okeechobee.

Also confirmed Monday April 7 at 1930 on SW Radio, Germany, 3975.003-, S9+10 into UTwente. Next:

0330 UT Tuesday WRMI 7780 to SW;
1300 UT Tuesday WRMI 9955 to SSE [also web-, phonecast];
1400 UT Tuesday WRMI 9955 to SSE [also web-, phonecast];
2000 UT Tuesday IRRS 1323-Italy;
2330 UT Tuesday WRMI 9395 to NNW;
2330 UT Tuesday SW Radio, Germany 3975;
1930 UT Wednesday SW Radio, Germany 3975 & 6160;
2100 UT Wednesday WBCQ 7490v to WSW;
0130 UT Thursday WRMI 5010 to S;
1630 UT Thursday SW Radio, Germany 3975.
(Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2289 monitoring April 6-7: ``Hi Glenn, Sunday at 2330 UTC World of Radio was also on 9455 besides 7780. At 0830 Monday heard on SW Radio 6160. Peter W Hansen`` Tnx! So now 9455 is the `extra` frequency instead of 7570 on WRMI.

Also confirmed UT Tuesday April 8 at 0330 on WRMI 7780, S9+5/10 into Durango2 SDR.

Also confirmed Tuesday April 8 at 1300 on WRMI 9955, S9/+10 direct. Again at 1400 on 9955, S7/S9 and much less readable.

I wasn`t listening, but World of Radio confirmed in Germany by Hansjoerg Biener: ``250408 7290 1835 0804 ROM IRRS, E, Gl. Hauser’s World of Radio 35433 HjBi - Thank you for your continued contribution to the hobby``, i.e. during the SW hour of IRRS now ex-7275. Program sked shows nothing in particular at this time, so maybe random filler but I`ve asked them if we can rely on it now.

Also confirmed Tuesday April 8 at 2000 on IRRS SW via AM Italia, 1322.997-, S9 into UTwente. Next:

2330 UT Tuesday WRMI 9395 to NNW;
2330 UT Tuesday SW Radio, Germany 3975;
1930 UT Wednesday SW Radio, Germany 3975 & 6160;
2100 UT Wednesday WBCQ 7490v to WSW;
0130 UT Thursday WRMI 5010 to S;
1630 UT Thursday SW Radio, Germany 3975.
(Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2289 monitoring: ``Richard Lemke, St. Albert, Alberta, Canada, from the desk of Richard’s listening Post, Radio: JRC NRD-535 HF (30 years of service), Antenna: random long wires in the trees. WRMI, USA, World of Radio #2289, 9395 kHz, 2330-2359, static, silent voice no program description, S6. start,

later heard voice, no clear ID, Glenn, voice, unsettled to stormy conditions WOR #2289, broadcast needs to be switched {to?} 0230, 9395 kHz. April 8 UTC 2025 [Tue] (Lemke, Richard -AB)``

Confirmed Tuesday April 8 at 2330 on WRMI 9395, S9/+15 into Maryland SDR.

Also confirmed Tuesday April 8 at 2338 the 2330 on SW Radio, Germany, 3975.003+, S7/9+5 into UTwente.

Also confirmed Wednesday April 9 at 1930 on SW Radio, Germany, 3975.002+, S9+10 into UTwente; and on 6165.001+, S9+10 into UTwente but with RTTYditty circa 6164.

Also confirmed Wednesday April 9 at 2100 on WBCQ 7490 -77 Hz = 7489.923, S9/+10 into Maryland SDR. At 2114 direct, JBA S9+10 vs S9 noise level. Next:

0130 UT Thursday WRMI 5010 to S;
1630 UT Thursday SW Radio, Germany 3975.

Financial support appreciated for our non-commercial public service program: thanks for a contribution via check on a US bank from Moises Corilloclla, Rego Park NY, to Glenn Hauser, P O Box 1684, Enid OK 73702.

One may also contribute via PayPal, not necessarily in US funds, to woradio at yahoo.com (Glenn Hauser, OK, WOR)

** U S A. 9930, April 3 at 1832, WTWW is on but only S7/S9 instead of usual blasting. Propagation? Altho 12160 WWCR is blasting, other 9 MHz UStations are also very weak to JBA carriers, 9395, 9330, 9265 (Glenn Hauser, OK, WOR)

** U S A. 9839-9853 approx., peaking circa 9848 at S9+15, April 4 at 1540, extremely distorted talk, matching 9930 WTWW with TOMBS on another receiver, not matching 9980 WWCR TOMBS, never synchronized (Glenn Hauser, OK, WOR)

** U S A. 10003, April 4 at 2204, scratchy spur from 9930 WTWW which hits S9+60; matches the TOMBS modulation peaks on a second receiver, not the TOMBS mod on 9980 WWCR which is also on but never synchronized. Like my previous obs on the lower side of 9930, i.e. plus/minus very roughly 80 kHz; except the high side is more diffuse. It can also be heard bothering 9955 WRMI, during undermodulated WOR. 10003 also threatens WWV. An hour later George and I discussed these; he could not hear the spurs, and by now they were weaker for me. Unfortunately, Ted kept the WTWW spectrum analyzer. 9930 also flanked by the stable spurcarriers circa 9917 & 9943, not such a problem for neighbors (Glenn Hauser, OK, WOR)

** U S A. 7780, April 3 at 0632, this WRMI-13 is OFF. and at 0635, so is 5010 WRMI-14. All others nominal. These would both normally be on TOMBS at this hour: tech problems, or reduxion in TOMBS $$/hours? (Glenn Hauser, OK, WORLD OF RADIO 2289)

** U S A. 7780, April 4 at 0553, this WRMI is off again despite sked, while a buzzy sound surrounds 7778. At 0558 check, 5010 WRMI is also off again (Glenn Hauser, OK, WOR)

** U S A. 7780 at 0631 April 5, WRMI-13 is off again vs some noise circa 7778; and at 0635 check, 5010 WRMI-14 is also off. Apparently a schedule change, not anomaly, despite no updating to skedgrid showing both until 1500*. And not a transmitter problem, as both 7780 & 5010 are heard normally earlier in evenings (Glenn Hauser, OK, WOR)

** U S A. 7780 & 5010, April 6 at 0630, these WRMIs are OFF again, as if deliberately contrary to own sked (Glenn Hauser, OK, WOR)

** U S A. Pre-`AAAWWW` chex of WBCQs, Apr 4 at 2350 into NH SDR: 3265, 5130 OFF. 6160 algo VP S6/7, else with dittering QRM. 7489.925, S9+15/20 with FKB. 9330 only S7/9+15 with music. As usual, 5130- autocutson at *2355 with IS & ID loop, S9+10, but drops to S7 a few times, from transmission or reception? At 0000 UT Sat Apr 5, 5130 & 7490- join for WTO theme of `AAAWWW`, not quite yet 9330 but soon also. Now I`m listening better via Maryland SDR. His first overwords are ``No matter what, it`s all about the freedom``. 0003 discussing microphoniums. Then Cold War, Communism, etc., etc. 0031 says from studio in Fla, 77 degrees, 65% humidity. Apologies for air-conditioning, which Angela dislikes. 0036 and 0040 playing music. 0045 trimulcasting on 9, 7 and 5; 0052 datestamp but I was distracted and missed it; think it must have been new and current. 0053 some email including one politically incorrect (Glenn Hauser, OK, WOR)

** U S A. 15134, 15138, 15142, 15146; 15154, 15158, 15162, 15166, April 3 at 1448, galaxy of spurs every ~4 kHz above and below 15150 WMLK, S9+25/35 with Yahweh stuff. They cut on and off with modulation peaks, JBA at the edges but quite strong closest to 15150. Something`s very busted at Bethel`s new 300 kW transmitter (Glenn Hauser, OK, WORLD OF RADIO 2289)

** U S A. 15150, April 4 at 1543, WMLK is off, unlike yesterday. Could they be working on fixing the galaxy of spurs every 4 kHz we heard yesterday? Fat chance, and it`s not even Sabbath yet (Glenn Hauser, OK, WOR)

** U S A. 9265, April 5 at 0622, WINB is still on with gospel huxter, more TOMBS? Not // 5850 WRMI. At 0632 it`s ``Walking in Simplicity`` with Bro. Steven. Anomaly or deliberate extension? Yet another station with a program schedule they don`t keep up to date with what axually airs! Dated March 9, obviously to account for imposition of DST, yet still shows a 5- rather than 4-hour difference between ET and UT! After all these years they can`t cope accurately with time changes. Anyhow, still shows off the air every night from midnight until 2:04 pm - except Sundays back on already at 6:04 am. And `Walking in Simplicity` is already on sked Sat at 4:30 pm > presumably 2030 UT instead of ``2130``. No info about it under Pgminfo. Broad websearch connects that motto with https://harvestchurch.org.bw/ - yes, in Botswana but nothing about any broadcasts. WRTH page 595 shows WINB sales manager is Sally Spyker; guess Hans Johnson, ex-CumbreDX is no longer with WINB. In 2016 WRTH quick check, he was the sales/frequency manager. 2025 WRTH shows besides 1 x 50 kW transmitter they have 1 x 15 kW. Were they ever on two frequencies at once, even during DRMing? (Glenn Hauser, OK, WOR)

** U S A. 9265, UT Mon April 7 at 0552, WINB is off as scheduled, unlike UT Sat Apr 5 when it was on past 0630. I think it was also off April 6 but not specifically un/logged (Glenn Hauser, OK, WOR)

** U S A. 4840, April 3 at 0635, this WWCR-3 is unusually OFF, due to storms? However, at 0633, 5890 is on with TOMBS despite it being a weekday, // 5850 WRMI, singing ``Marching to Zion``. 5890 shows up occasionally on `wrong` overnights.

Then day frequency of WWCR-3, 13845 is also OFF at 1457, still off past 1500 and 1615, while 9980 & 12160 are blasting in. By 1831, 13845 still off, 9980 also off as scheduled, leaving only 12160 on. Since WWCR-1 service was discontinued voluntarily, if that transmitter and antenna still be funxional, why couldn`t they apply those to the WWCR-3 13845/4840 schedule?

April 3 at 1446, Ron Trotto-WDX4KWI, Virden, Illinois, reported, ``I noticed last night WWCR was off the air on all frequencies around 0530 UT. I checked 650 WSM they were on and off. Wondering if everyone is OK in the Nashville area of Tenn`` (Glenn Hauser, OK, WORLD OF RADIO 2289)

** U S A. 13845, April 4 at 1534, WWCR is JBA here but blasting in on 12160 S9+35, 9980 at S9+50 - a clear MUF sharpoff circa 13 MHz, unless 13845 be underpowered. Yes, this WWCR back on air today, as was 4840 at night, both absent the previous date (Glenn Hauser, OK, WOR)

** U S A. 5935, 5890, 4840, April 6 at 0320 & 0325, all possible WWCRs are OFF, probably due to storms, but neighbor in more ways than one, 5920 WTWW is S9+50 (Glenn Hauser, OK, WOR)

** U S A. 5935, 5890, 4840, UT Sun April 6 at 0628, all WWCRs are still OFF, like 3 hours before, presumably due to storms. By next check 1448, 13845 on at S9+20, 7490 at S9+30, but 9980 JBA carrier, else? Nothing else is ever on 9980 per EiBi, Aoki, HFCC. WWCR-4 9980 is supposed to run straight thru 12-24 on Sat & Sun, tho off at 16-22 M-F - and tho dated April 1, WWCR own sked shows wrong relation between Central and UTC of 6 hours instead of 5! After all these years, WWCR still can`t cope with DST accurately. Presumably program times be correct in CDT as above if you ignore UTC column (Glenn Hauser, OK, WOR)

** U S A. 560, April 7 at 0600, ``Springfield, all-new KWTO`` and Fox ``news`` which might have been CCI. So what`s new about it??? Presumably meaningless blather. Please show exactly what was old and done away with? Originally meant, a back-formation? ``Keep Watching The Ozarx`` but now per radio-locator it`s ``Keeping an Eye on the Ozarks``, even tho the call has not been newly changed to KAEOTO (Glenn Hauser, OK, WOR)

** U S A. 750, April 7 at 0603 UT, WSB seems missing, only a weak signal compared to 760, 780, etc. But, no, WSB ID at 0605. Is QRP? (Glenn Hauser, OK, WOR)

** U S A. 1530, this info from NRC DX News Apr 15, published Apr 7, bears on my latest logs of KZNX:

``1530 KZNX TX Creedmoor – Granted STA, U7 10000/36 (ch 1000), night operation from day/CH site with CH pattern; night site is not operational.
1530 WCKY OH Cincinnati – Granted STA extension, U1 50000/12500.

- - - BORDER INN CORRECTION - - -
1530 KZNX TX Creedmore {sic} – 10/26 0558 [EDT?] – Clobbering KFBK with regional Mexican music and “la raza” slogans, mentioning KTXX-FM 104.9 and translator on 95.1, and secondary slogan “la que manda en Austin.” Earlier this evening, they gave a bizarre mis-ID as “XEZR, La Sonora de Margarita” before giving their legal ID, in which the announcer seemed to stumble while reading the AM calls. Listed 220 Watts nights, but they are clearly running their 10 kW day power all night again. 1117 miles. (TRH-UT){Tim Hall} (Glenn Hauser, OK, WOR)

** U S A. 1540 kHz, April 6 at 0334 UT, Spanglish adstring for numerous events, concerts later in April, May, mentions San Antonio; and income tax ad at 927-1040 on S. Willow? St., 830 area code for a strawberry festival, which = Eagle Pass, Del Rio, approaching San Antonio, so I conclude this be KEDA. Trouble is, a big het on the minus side, about 1539.95, which is surely KGBC Galveston, but I`m only hearing one audio. KEDA is U4 5/1 kW, with very unfavorable night pattern to the WNW, but daypat circa-circular per radio-locator;

while the NRC Pattern Book 2013 shows similar day to night, just larger (Glenn Hauser, OK, WOR)

** VANUATU. 7260, April 4 at 0552, R. Vanuatu already JBA (Glenn Hauser, OK, WOR)

** VANUATU. 9960, April 9 at 0652, RV reactivated here, island music and nothing on 7260 which I check every night around this time. Somewhat better signal now, S6/S7 direct and 9955 WRMITOMBS not a problem. 9960 chops off abruptly during music at 0658:14*. I retune to 7260 but never shows there, so where? No signal on 5040. But there is a JBA carrier on 3945 by 0700! I had not even been checking that on the assumption it would not be audible direct so early. But Port Vila sunset today is 0641 UT, so it is certainly possible. Earliest SS in a bimonth will be 0619. Unfortunately, 3945 still failing to harmonicize on 7890, 11835 or 15780. NSB/Nikkei, Japan on 3945 is no longer listed in WRTH, EiBi nor Aoki, tho IIRC it came back on briefly for a special event. Only Vanuatu listed on 3945. Of course there could also be spoiler hAMs or even pirates (Glenn Hauser, OK, WOR)

** VENEZUELA [and non]. 60 meter band vacant! of any SW broadcasters, beyond WWV, April 3 at 0635, NO: 4840 WWCR, NO Estacion 4940, NO 5010 WRMI, NO 5025 CUBA (Glenn Hauser, OK, WOR)

** VENEZUELA. 4940, April 6 at 0631, JBA signal is the OSOB = only station on band, that is, among broadcasters, besides WWV. Cuba 5025 also off. Wolfgang Büschel measured it at 0330 on 4939.982, from Colombia? Some still attribute Estación 4940 to Colombia, but it is well established by now as Venezuela. Despite EiBi putting it in Colombia, target Venezuela; that`s better than Aoki which ignores it completely, leading some to listlog 4940 as R. San Antonio, Perú, which hasn`t really been heard for many years! (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 810.59 kHz, April 6 at 0644 UT, JBA carrier aside 810 WHB. Still hearing this mystery tho not every night. I challenge anyone to ID it or at least DF/triangulate source (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 1480, April 8 at 0625 UT, YL in Spanish instead of KQAM Wichita in English, or KNGO Metroplex in Vietnamese. Several possibilities but most likely KLVL Pasadena TX, U1 5000/500 (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 7200 LSB, April 5 at 0624, song S9, apparently from a recording, then naughty ham attempting to sing (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 12000, April 6 at 0310, algo S5/S7 with flutter, JBM? Suspect it`s 2 x 6000 RHC which happens to be on now JBM and is a known harmonicizer; however, Aoki & EiBi show there happens to be one real 12000 station this hour only, CRI English via Kasghar = Kashi-Saiba, East Turkistan to S Asia; standard denunciation (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 15470, April 3 at 1452, S5/S7 of dead air, off by 1458. Nothing listed for A25 now in Aoki but EiBi & HFCC have only IRAN in Dari at 0920-1250. IRIB has been reported elsewhen with dead air (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 17432-17463 approx., April 6 at 1442, multi-carrier, multi-tones beating, peaking S7 around 17450. Have been hearing this for long time; what is it? I recently gathered several other such logs at different frequency ranges, posted to UDXF iog, asking if anyone has any info about it? A single reply: ``Mike Chace-Ortiz Apr 3

#119371 The 48 kHz wide signals are one of the many sent by the stations testing HF for High Frequency Trading. 73 —mco``

Well, this one was only 31 kHz wide. OK, they must be licensed by FCC or equivalent. Any way to locate them? I also posted my other mystery, open carriers ending in 6, surrounded by clickery: zero replies (Glenn Hauser, OK, WOR)
